

## Statement of Support for the Refreshed Compact December 2009

'We welcome the refreshed Compact document and believe it represents a clear improvement. We look forward to it ensuring better partnership working between the two sectors, allowing each to do what it does best. This is especially important over the next few years with the current economic difficulties. We hope this is the beginning of a new era when Compact principles will truly underpin the way in which the two sectors work better together.'
