

Statement of Support for the Renewed Compact December 2010

'We welcome this renewed Compact, and the new accountability measures announced alongside, as a significant step forward in the sector's relationship with Government. The current economic difficulties, and pace of reform, have put heavy pressures on our sector. We look forward to the Government fully implementing this renewed Compact immediately to ensure changes are undertaken in a Compact compliant way, which will minimise disruption while ensuring the best outcomes for citizens and communities are achieved.'
